The TRIC about the Clip - for fast and safe panel installation. A flick of the hand, and the TRIC clip panel fastener automatically snaps into the right position, confirmed by an acoustic signal. Fits with all TRIC on-roof and free standing systems.

STANDOUTS

- **Safe and simple installation**
- **Patented design**
- **Significant time saving**
- **High quality, favorably priced**

DETAILS

A flick of the wrist, a clicking signal, and the TRIC clip panel clamp safely finds itself in the right position, while it can still be moved if required.

In an ingenious way the patented TRIC clip connects the power of innovation with more than 30 years of experience. The clever mechanism turns panel installation into child's play.

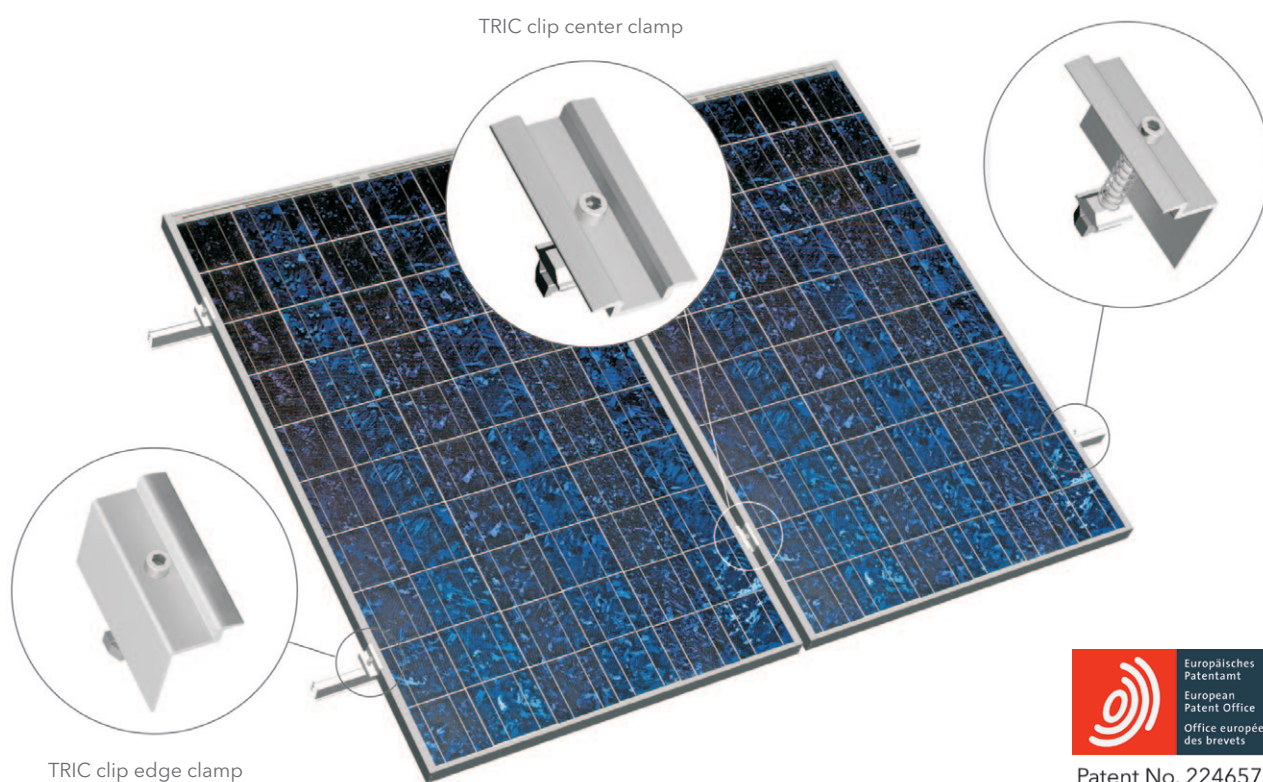

The panel clamp comes completely pre-assembled, ready for instant installation. You will effortlessly speed through your installation and quickly be ready for your next project.

The TRIC clip is manufactured in Germany with state of the art production equipment. You therefore benefit from significant added value and high quality, all combined with an extremely favorable price.

Panel Fastener TRIC clip

State of the art production
with „Made-in-Germany“ quality

Patent No. 2246577

Technical data	TRIC clip
Application	Suitable for all TRIC on-roof and free-standing systems and all TRIC mounting rails
Panel types	All common framed PV panels with frame thickness from 30 to 55 mm
Material	Aluminum and stainless steel
Color	Aluminum shiny, or anodized black
Product warranty	10 years
