ENERGIETECHNIEK

The solar domestic water heating package **EASY line** is pre-assembled and hence quickly installed. Top quality material and 40 years of experience assure high yields for a long time.

STANDOUTS

- **Quick installation**
- **High quality**
- **Powerful**
- **Flexible**

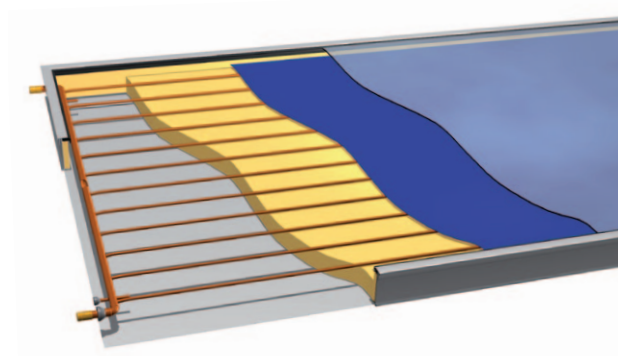

DETAILS

Solar circulator CIRCO 7, solar controller SUNGO 100, expansion vessel and safety elements are pre-assembled at the storage tank. Connecting storage and DHW system is considerably simplified.

Utilizing high quality materials as well as longtime experience guarantee reliable operation and long lifetime.

We developed collector, storage tank, solar circulator and controller with perfection to detail. They are optimally fine tuned system components designed to maximize solar yields, as has been proven time and again by tests of independent German consumer testing organizations.

Varying numbers and types of collectors, three different mounting options and various useful accessories allow you to compose an EASY line system according to your wishes and needs.

EURO solar collectors from our own production - powerful, durable, perfection to detail

EASY LINE SOLAR PACKAGES

- 2 or 3 flat plate collectors EURO
- 1 Collector mounting set EURO TRIC
- 1 solar storage tank EASY line 300 or 400 l
- 1 pre-assembled solar circulator CIRCO 7 with solar controller SUNGO 100
- 1 pre-assembled expansion vessel with cap valve
- 1 collecting vessel for solar liquid
- Incl. extensive accessories package
- Optional accessories: TWINflex, heat meter, electric immersion heater

OPTIONAL ACCESSORIES:

Rapid piping system TWINflex

Heat meter

Electric immersion heater

Technical data	EASY line solar packages
Solar collectors	EURO L20 AR, L22 AR (black or silver) or L42 HTF (silver); Solar Keymark certified
Mounting type	Collector mounting system EURO TRIC for on-roof, in-roof and free standing setup; choice of roof brackets (in-roof kits for pantile or slate/plain tile roofs)
Solar storage tank	Solar storage tank EASY line 300 or 400 l with 50 mm hard foam insulation
Solar circulator	Solar circulation unit CIRCO 7 with pre-assembled solar controller SUNGO 100 and pre-assembled expansion vessel including cap valve
Accessories package	Solar liquid, thermostatic mixer, storage safety subassembly, sensor connection box
TWINflex (option)	Rapid piping system TWINflex: set comprises stainless steel ripple tube and quick-connectors
Heat meter (option)	Heat meter - to monitor proper system operation
Electric immersion heater (option)	1.5 or 3 kW immersion heaters for electric backup heating
