

Mounting System TRIC fence home

TRIC fence home - stylish privacy protection and solar power utilization

Take advantage of synergy effects and generate additional added value with our TRIC PV fence home. Ideal for private, commercial, or agricultural properties.

Winner of the *Best Innovation Award* for strong innovative power and high practical value.

STANDOUTS

- **Maximum energy yield**
- **Simple and stable installation**
- **Attractive design**
- **Flexible and versatile**

DETAILS

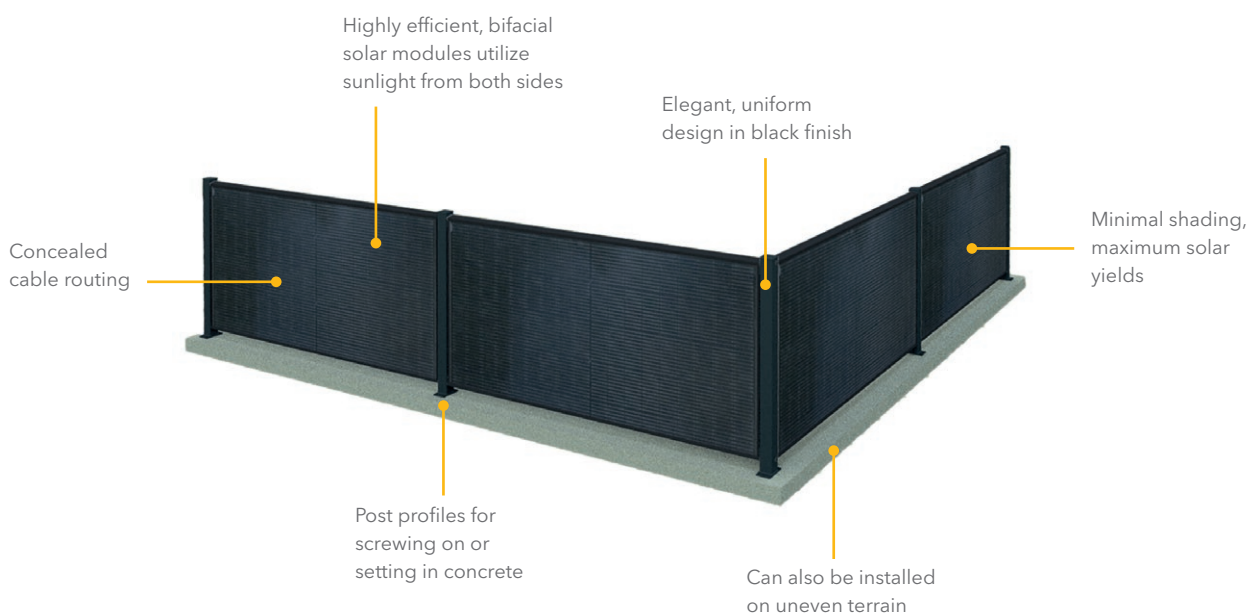

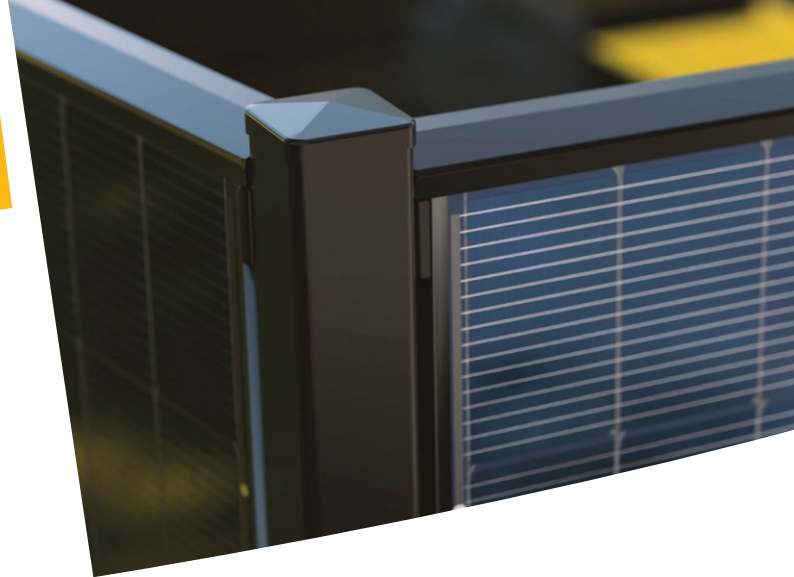

Highly efficient, bifacial solar modules utilize sunlight from both sides. Increased yield due to reduced shading losses.

The post profiles can either be set in concrete or screwed on. Quick installation and permanently secure hold without complex foundation work.

Modern, elegant look, for gardens, driveways, or property boundaries. Weather-resistant materials for a long service life.

Both east-west and south orientations are possible. Installation can also be carried out on sloping, uneven terrain.
